

Premium Grade Self Amalgamating EPR Tape

Product Introduction:

Premium Grade Self Amalgamating EPR Tape is a self-amalgamating EPR (Ethylene Propylene Rubber) based, high voltage jointing tape, it is non-vulcanizing and shelf-stable with excellent electrical properties. It can be used as insulation for low voltage applications as well as insulation for joints up to 69kV.

Size:

19mm x 0.76mm x 9.15m

50mm x 0.76mm x 9.15m

Features:

- Physical and electrical properties are unaffected by the degree of stretch
- Can be stretched up to 100% to give void-free, moisture-resistant insulation
- Excellent electrical properties

Applications:

- Primary insulation for building stress cones on cables up to 35 Kv
- Primary electrical insulation for cable jointing and terminating up to 69 Kv with up to 90°C continuous operating temperatures and 130°C emergency overload temperature
