

Terminals

A terminal is the point at which a conductor from a component, device or network comes to an end. Terminal may also refer to an electrical connector at this endpoint, acting as the reusable interface to a conductor and creating a point where external circuits can be connected.

Terminals are used to finish the connection to thousands of different electrical installations. They are very versatile and come in many styles to suit many applications. They are made of copper (economy versions use brass) and they are tin-plated to prevent corrosion.

Insulated Terminals

- Semi-translucent insulation makes it easier to see if you've made a good connection
- Most can be 'double-crimped' on the wire and the insulation, providing a stronger connection
- PVC insulation is more flexible and less prone to cracking than vinyl
- More chemical resistant than vinyl
- Wide selection of options
- Easy crimp on installation

Closed End Connectors

- Closed end connectors are crimp-able for a quick, inexpensive, easy and permanent electrical connection of two or more wires.
- Simply insert wires all the way into the closed end connector and crimp around the barrel using any standard wire crimpers.

Pre-Insulated End Connector Terminals (Closed-End Connectors)

Part No	Material	End Connector Size	Wire Diameter
T/91601	Copper	1	0.75mm-1.5mm
T/91602	Copper	2	2.5mm
T/91603	Copper	3	4.0 -6.0mm

Terminals

QUICK SPLICES

- Quick splices provide a simple and time saving wire connection method.
- It is available for in-line and T-tap wire connections and accept various wire and tab sizes.
- Splice connectors are plastic clips used to make quick splices or connections with two or more pieces of wire.
- They are designed for use with electrical cables, telephone cables and electrical device wires.
- It can be used a splice connector to splice wires without having to solder them.

Fully Insulated Instant Taps (Quick-Splice)

Part No	Material	Size	Colour
T/RFIT	Copper	0.5mm-1.0mm	Red
T/BFIT	Copper	1.5mm-2.5mm	Blue
T/YFIT	Copper	1.5mm-2.5mm	Yellow
