

Solar Connector Dust Covers

Dust covers are manufactured from a flexible and durable material and are compatible to the standard MC4 (Type) PV cable- and panel mount connectors. The design effectively prevents unnecessary ingress of dust.

- Rated Current: 30A
- Pin Dimension: 4mm²
- Suitable Cable: 205mm – 10.0mm²
- Shell Protection Degree: IP67
- Prevents unnecessary cleaning and possible damage of the male- or female PV pin due to dust ingress.
- Prevents possible hot connections due to damaged connectors.
- Dust covers are re-usable.
- The O-Ring on the female connector is protected and therefore retains its IP rating and safety principle against dangerous DC arcing.
- Avoids unscheduled maintenance and repairs.
- Protection for any unused panel mount-and-cable connectors.
- Dust cover can be secured to the connector if required.
