

MC4 Connectors System - Pre-Assembled Leads

Quick and convenient alternative to crimping own connections. MC4 solar extension cable allows making spatial adjustments to solar power system in one simple step. This extension cable runs between the solar panel and charge controller or between two solar panels, allowing for greater space between both items. Allows for greater customization of the solar power system.

MC4 extension cable has a male connector on one end and a female connector on the opposite end. They are available in many different lengths from 2m to 12m long.
