

Nylon Cable Tie Saddles

TY Self Adhesive Cable Tie Mounts

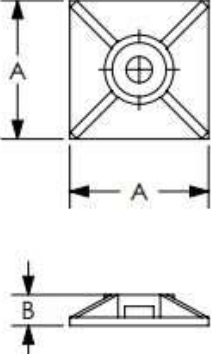

TY mounts are particularly suitable for applications with minimal space - they are mounted into the equipment prior to cable installation. The cables can be attached using a range of standard cable ties. Application

These products are designed for simple, yet robust, installation in a wide variety of applications - particularly used in telecoms equipment, switchgear and control cabinets.

Bi-directional Nylon Square Bases with Adhesive Type

In natural or black, self-extinguishing nylon. The cable ties are slotted through the eyelets for fixing cables or other items to the wall. The round or square shape reduces bulkiness. The bases come with the adhesive already applied. Walls must be smooth and grease-free.
